

# Taurus Runoff Filter

## Water Runoff Filtration

The Taurus Runoff Filter (TRF) is a reliable filtration device designed for site-specific installation in runoff streams. Great for parking lots, production facilities or asphalt, these filters work to address stormwater pollution before it leaves your site. This reduces the amount of contaminants in streams and helps keep water debris-free as it enters a stormwater system.

# Taurus Runoff Filter

## Water Runoff Filtration

### Taurus Runoff Filter Features

- Brackets: 8" x 16" - 1/4" x 2"
- Nonwoven Geotextile Fabric
- Options: Kits, Frame Only or Replacement Filters
- Kits Include: Filter, Frame, 5.5 oz. Caulk, Roller

### Taurus Runoff Filter Benefits

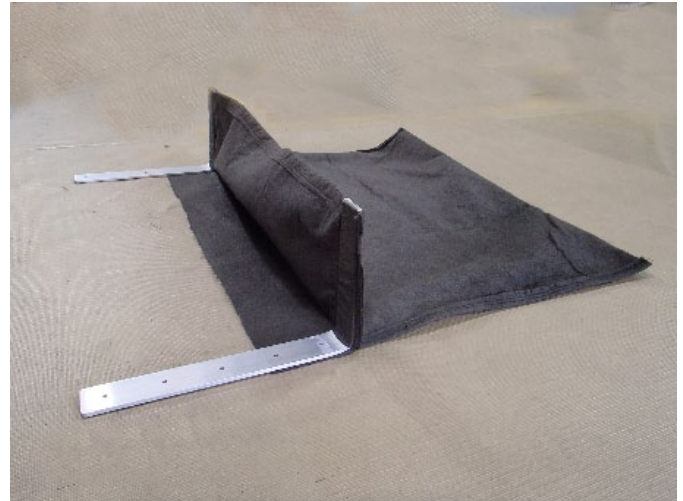

- One Size Fits All Brackets
- Targets Areas with Runoff Problems
- Sits in Natural Runoff Flows
- Easy to Access and Remove Debris
- Can Be Used on Their Own or in a Series
- Keeps Natural Flows While Still Removing Pollutants

### Taurus Runoff Filter Applications

- Parking Lots
- Asphalt
- Production Facilities
- Warehouse

### Taurus Runoff Filter Installation

TRF Units are installed to the concrete through standard brackets. Brackets are placed into the side pockets of the drain filter and then secured to the ground. All units should be tested to ensure proper placement and use around your site.
